

Paxillin (phospho Tyr118) rabbit pAb

Cat No.:ES1392

For research use only

Overview

Product Name	Paxillin (phospho Tyr118) rabbit pAb
Host species	Rabbit
Applications	WB;ELISA
Species Cross-Reactivity	Human;Mouse;Rat
Recommended dilutions	Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications.
Immunogen	The antiserum was produced against synthesized peptide derived from human Paxillin around the phosphorylation site of Tyr118. AA range:85-134
Specificity	Phospho-Paxillin (Y118) Polyclonal Antibody detects endogenous levels of Paxillin protein only when phosphorylated at Y118.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Storage	Store at -20°C. Avoid repeated freeze-thaw cycles.
Protein Name	Paxillin
Gene Name	PXN
Cellular localization	Cytoplasm, cytoskeleton . Cell junction, focal adhesion . Cytoplasm, cell cortex . Colocalizes with integrins at the cell periphery. Colocalize with PXN to membrane ruffles and the leading edge of migrating cells (PubMed:23128389). .
Purification	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Clonality	Polyclonal
Concentration	1 mg/ml
Observed band	64kD
Human Gene ID	5829
Human Swiss-Prot Number	P49023
Alternative Names	PXN; Paxillin
Background	This gene encodes a cytoskeletal protein involved in actin-membrane attachment at sites of cell adhesion

to the extracellular matrix (focal adhesion). Alternatively spliced transcript variants encoding different isoforms have been described for this gene. These isoforms exhibit different expression pattern, and have different biochemical, as well as physiological properties (PMID:9054445). [provided by RefSeq, Aug 2011],

Western Blot analysis of various cells using Phospho-Paxillin (Y118) Polyclonal Antibody

Western blot analysis of lysates from HeLa cells treated with EGF, using Paxillin (Phospho-Tyr118) Antibody. The lane on the right is blocked with the phospho peptide.
