

## JNK1/2/3 (phospho Tyr185) rabbit pAb

Cat No.: ES1499

For research use only

## Overview

Product Name JNK1/2/3 (phospho Tyr185) rabbit pAb

Host species Rabbit

**Applications** IF;WB;IHC;ELISA **Species Cross-Reactivity** Human;Mouse;Rat

**Recommended dilutions** IF: 1:50-200 Western Blot: 1/500 - 1/2000.

Immunohistochemistry: 1/100 - 1/300. ELISA: 1/20000. Not yet tested in other applications.

Immunogen The antiserum was produced against synthesized

peptide derived from human SAPK/JNK around the phosphorylation site of Tyr185. AA range:151-200

**Specificity** Phospho-JNK1/2/3 (Y185) Polyclonal Antibody

detects endogenous levels of JNK1/2/3 protein only

when phosphorylated at Y185.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and

0.02% sodium azide.

**Storage** Store at -20°C. Avoid repeated freeze-thaw cycles.

Protein Name Mitogen-activated protein kinase 8/9/10

Gene Name MAPK8/9/10

**Cellular localization** Cytoplasm . Nucleus . Cell junction, synapse . In the

cortical neurons, predominantly cytoplasmic and associated with the Golgi apparatus and endosomal fraction. Increased neuronal activity increases

phosphorylated form at synapses (By similarity).

Colocalizes with POU5F1 in the nucleus. .

**Purification** The antibody was affinity-purified from rabbit

antiserum by affinity-chromatography using

epitope-specific immunogen.

ClonalityPolyclonalConcentration1 mg/mlObserved band45kD

+86-27-59760950

Human Gene ID 5599/5601/5602

Human Swiss-Prot Number P45983/P45984/P53779

Alternative Names MAPK8; JNK1; PRKM8; SAPK1; SAPK1C;

**Background** 

Mitogen-activated protein kinase 8; MAP kinase 8; MAPK 8; JNK-46; Stress-activated protein kinase 1c; SAPK1c; Stress-activated protein kinase JNK1; c-Jun N-terminal kinase 1; MAPK9; JNK2; PRKM9; SAPK1A; Mi

The protein encoded by this gene is a member of the MAP kinase family. MAP kinases act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. This kinase is activated by various cell stimuli, and targets specific transcription factors, and thus mediates immediate-early gene expression in response to cell stimuli. The activation of this kinase by tumor-necrosis factor alpha (TNF-alpha) is found to be required for TNF-alpha induced apoptosis. This kinase is also involved in UV radiation induced apoptosis, which is thought to be related to cytochrom c-mediated cell death pathway. Studies of the mouse counterpart of this gene suggested that this kinase play a key role in T cell proliferation, apoptosis and differentiation. Several alternatively spl

Immunofluorescence analysis of human-lung tissue.
