

## THP rabbit pAb

Cat No.: ES7477

For research use only

## Overview

Product Name THP rabbit pAb

Host species Rabbit

Applications WB; ELISA;IHC Species Cross-Reactivity Human;Rat;Mouse;

**Recommended dilutions** WB 1:500-2000;IHC-p 1:50-300; ELISA 2000-20000 **Immunogen** The antiserum was produced against synthesized

peptide derived from human THP. AA range: 329-378  $\,$ 

**Specificity** THP Polyclonal Antibody detects endogenous levels

of THP protein.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and

0.02% sodium azide.

**Storage** Store at -20°C. Avoid repeated freeze-thaw cycles.

Protein Name Uromodulin Gene Name UMOD

**Cellular localization** Apical cell membrane; Lipid-anchor, GPI-anchor.

Basolateral cell membrane; Lipid-anchor,

GPI-anchor . Cell projection, cilium membrane . Only a small fraction sorts to the basolateral pole of tubular epithelial cells compared to apical

localization (Pu

**Purification** The antibody was affinity-purified from rabbit

antiserum by affinity-chromatography using

epitope-specific immunogen.

Clonality Polyclonal
Concentration 1 mg/ml
Observed band 70kD
Human Gene ID 7369
Human Swiss-Prot Number P07911

Alternative Names UMOD; Uromodulin; Tamm-Horsfall urinary

glycoprotein; THP

**Background** The protein encoded by this gene is the most

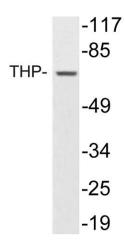

abundant protein in mammalian urine under physiological conditions. Its excretion in urine

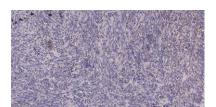

+86-27-59760950 ELKbio@ELKbiotech.com www.elkbiotech.com

follows proteolytic cleavage of the ectodomain of its glycosyl phosphatidylinosital-anchored counterpart that is situated on the luminal cell surface of the loop of Henle. This protein may act as a constitutive inhibitor of calcium crystallization in renal fluids. Excretion of this protein in urine may provide defense against urinary tract infections caused by uropathogenic bacteria. Defects in this gene are associated with the renal disorders medullary cystic kidney disease-2 (MCKD2), glomerulocystic kidney disease with hyperuricemia and isosthenuria (GCKDHI), and familial juvenile hyperuricemic nephropathy (FJHN). Alternative splicing of this gene results in multiple transcript variants. [provided by RefSeq, Jul 2013],

Western blot analysis of lysate from K562 cells, using THP antibody.
